BitWings
coins virtual money
Bitwings is the first crypto coin of technological shelter able to resist the crisis of the cryptocurrency market.
Is there a real crisis of cryptocurrency in the market?
3.968,77 USD - 2.394,61 USD (37,62%)
112,83 USD - 88,65 USD (44,01%)
Why don’t you risk buying bitwings?
We offer you a 100% Guarantee. Thanks to the use of BWNTG (Bitwings Token Guarantee)
The **BWNTG** - It acts as a real *store of value* for those who have purchased the Bitwings Token (BWN)
The BWNTG - It ensures the emission value of $0.2 so as to act as a protection against market fluctuations.
How do we guarantee **100% of the value** of Bitwings?
THE VALUE OF THE BWN INCREASES

In this case, you will have obtained an advantage in relation to the amount in BWN purchased and the % of bonuses you receive during the ICO phase in which you participate.

THE VALUE OF THE BWN DECREASES

We can guarantee for your BWN a value of $0.20 in all Wings Mobile stores: On Line and Off Line. In practice, you would have the equivalent in technology products corresponding to the capital invested in buying tokens. This tool prevents eventual collapse of the BWN value, since being accepted directly from wings mobile at the minimum value of $0.20, any speculation capable of lowering the value of the token with a sale below the emission value is avoided.

// BWNTG MODEL
Why is bitwings **waterproof** to the cryptocurrency market (and therefore to their manipulation)?
The true nature of BTC and ETH ...
The BTC market, ETH and other alternative cryptocurrency has a trend linked to information in future that is often not found.
The purpose of this information is creating a market that is *easily* manipulated by the big pool.
There is currently no economic reference that allows anyone who buys or sells a crypto coin in an exchange ...
... an **objective** analysis of **real** value and a **real** forecast of growth
The result is a trading activity linked exclusively to the speculative and non-cognitive performance of supply and demand
Are you tired of all this?
Bitwings is born! The first crypto currency that, like the dollar, bases its economy on the financial system of a dynamic/real company.
What does it mean to base your economy in the financial system of a real company?
The US dollar bases its exchange rate on the economic stability of its country.
So imagine that the United States of America is a giant multinational with its own commercial and financial strategy.
The unemployment rate, oil reserves, the increase in GDP.
They are all factors that, in an objective, measurable and demonstrable manner ...
... affect the economic stability of the country and therefore the monetary prices of the dollar.
Wings Mobile is also a company that bases its stability on a real economy.
Yes. Just like that of the United States of America!
Wings Mobile has a solid commercial strategy that will bring it, by the end of 2019, to expand its presence throughout the World.
Objective, measurable and demonstrable activities that will increase the value of the bitwings in a **dizzying way** by the end of 2019 (as shown in the next graph)
Bitwings Trend 2019/2020

- Aprile-Maggio_Giugno: MWC 2019 MEXICO, OPENING WINGS MOBILE USA, OPENING WINGS MOBILE BRAZIL
- Luglio-Agosto-Settembre: LISTING TOP 3 EXCHANGE, MINEPHONE DISTRIBUTION, OPENING 10 BUSINESS UNIT
- Ottobre-Novembre-Dicembre: TELEPHONE OPERATOR AGREEMENTS, TECHNOLOGICAL PARTNERSHIP, OPENING 36 BUSINESS UNIT
- Gennaio-Febbraio-Marzo: YEAR 2019 RESULTS, COMMERCIAL DEVELOPMENT 2020
The growth is guaranteed by the *extreme dynamism* of the verifiable and truthful information generated by the commercial development of Wings Mobile in *36 countries*.
What **NEVER SUCCEEDED** within an exchange blockchain
Wings Mobile ... why should I believe in this company now by investing in capital?
In 2007 Wings Mobile was born.

From September 2018 3 new Wings Mobile Business Units will be operative: Colombia, Peru and Ecuador.

The opening of the remaining markets is scheduled for 2020, with the opening of an additional 20 Business Units

July 2017 the new Wings Mobile project is presented and in December of the same year, the first devices are distributed in the Spanish market.

2019 sees the total opening of 36 Business Units, located in Europe, and the American continent

>1 billion of revenue

UNIQUE PRODUCTS WITH PROPRIETARY TECHNOLOGY
WINGS SUITE™

Wings Suite is a unique application, designed for all users who simultaneously use the PC and mobile phone or who find themselves with little battery in the phone. Wings Suite allows the user to transfer all the functions of WINGS PHONE (Secure Call, VoIP Call, Second Number, Wings DIALER) directly to the laptop (WINGS BOOK), including GSM calls from any mobile operator.

WINGS DEFENDER™

Wings Books uses the Windows 10 operating system and, in order to ensure a high performance and safe use, could not miss the integration of a complete and powerful Antivirus: Wings Defender. Constantly updated on all types of trojan, virus, malware. It optimizes security and guarantees the user total protection, cpu, ram and battery optimization.
NEURAL NETWORK PROCESSORS FUNCTIONS:
- Encrypted Hardware call
- Smart battery and recharge management
- Optimal camera management
- Recognition of objects, faces and scenes
- Intelligent management of GSM and data band
- Recognition of network anomalies (e.g., IMSI Catcher)
- Recognition of abnormal behavior such as intrusion attempts (Trojans, malware, backdoors) or interception attempts (MITM or IMSI Catcher attack)
- Full wipe data in case of compromised phone

WINGS SOFTWARE INCLUDED:
- WINGS SAFE CORE™
- WINGS NEURAL FACE ID™
- WINGS GUARDIAN 2.0™
- WINGS SECURE CALL™
- WINGS PLAY STORE™
- WINGS SECOND NUMBER™
- WINGS WORLD ROAMING FREE™
- WINGS VOIP CALL™
- WINGS DIALER™

ICO Bitwings
UTILITY TOKEN

POSITIVE ELEMENTS:
• 1990 COINS PRESENT IN THE MARKET
• Market Cap: $ 229,158,722,707
• 24h Vol: $ 13,808,771,275
• LISTED IN MASS EXCHANGE

START THE ICO AS A TOKEN UTILITY

Thanks to the commercial dynamism of Wings Mobile, which allows a monthly visibility of the market results obtained, bitwings, once quoted in the main exchanges, has the ability to feed from other currencies that do not enjoy a real and active market like that of mobile wings.

This is why it is very important to be listed on major exchanges, where the main market crypts are currently listed.

PARTNERS:

www.biclub.com
www.blockboostventures.com
www.evanluthra.com

OBJECTIVES 2019:

• Complete bitwings ico first step: 32Mln USD
• Listing in the main exchange.
• Sell in 2019 over 250,000 devices
• Make in 2019 over 100 mln usd revenue
• Create 36 business unit in 36 market country
• Sell more of 3,500 wings store (full store & multi brand store)
• make over 10,000 affiliated wings mobile

PUBLICATION OF THE RESULTS OBTAINED AFTER THE ICO PERIODICALLY (EVERY WEEK)

In order to achieve a great deal of interactivity with investors, greater positive exposure of the media which allows the value of Bitwings to be reassessed, at this stage the achievement of the 2019 objectives is important and primary.
Evan Luthra is a top 30, under 30 Entrepreneur with a 500M in market cap company. Evan met Antonio Milio in Barcelona (Spain). Evan loved Wings Mobile project and has signed a agreement as bitwings advisor.

Evan is a featured speaker at different universities and conferences around the globe where he speaks about Technology, CryptoCurrencies and Blockchain to huge audiences. He has previously spoken at the United Nations, TEDx, Google, Crypto Investor Show, G20, Blockshow and more.

**2017 ICO**

- **EOS**: 4,100 MLN USD
- **Telegram**: 1,700 MLN USD
- **SIRIN LABS**: 153 MLN USD
It is expected that the security token market in 2019 will be so relevant that it will force the major Exchange to create a special security token listing. In the last phase of 2019, Wings Mobile released the security bitwings token according to the SEC (U.S. Securities and Exchange Commission) regulations.

After a first positive ICO and based on the results obtained by Wings Mobile in 2019, Wings Mobile will be the first major company that is shared in a crypto market through the issue of security tokens. At this stage it is important and primary to achieve the objectives listed below:

**OBJECTIVES SECURITY TOKEN END 2019:**

- DESTINY 30% OF WINGS MOBILE NET PROFITS TO THE SECURITY TOKEN ISSUE
- ISSUE OF 1,000 MLN OF SECURITY TOKEN
- THE EMISSION VALUE WILL BE CALCULATED ACCORDING TO THE AVERAGE OF THE LAST QUARTER VALUE QUOTATION OF THE UTILITY TOKEN, MORE THAN 20% OF REVALUATION.
- OBTAIN “SECURITY” AUTORIZATION
- CONVERT AND ACCEPT UTILITY TOKEN IN SECURITY TOKEN
- LISTING IN THE MAIN EXCHANGE
Reflections…
Based on this project the ICO is divided into 2 phases so as to allow Wings Mobile to obtain the largest capitalization both in the present and future. This is thanks to the current use of the utility and in 2020 of the security.
Investors will be much more interested in knowing that the utility token will be converted into a security token in less than 1 year.
The capitalization and growth of Bitwings will be exceptional.
DISTRIBUTION AND ALLOCATION OF TOKEN

DISTRIBUTION OF TOKEN'S

- Team & Advisor: 20%
- Marketing Bonus: 8%
- Reserve: 15%
- Bounty & Airdrop: 10%
- Referral program: 8%
- Public Sell 4St: 5%
- Private Sell: 5%

- COGS (Cost Of Goods Sold): 6%
- R&D (research and development): 6%
- ADV & Marketing: 6%
- Operations: 6%
- Others: 55%

BitWings
Evan is one of the most dynamic entrepreneurs in the world in the technology sector. He is on the list of the Top 30 Millionaires in the world under the age of 30. Ennored by the Wings Mobile project, he has decided to support it and to collaborate in the launch of the ICO Bitwings.
Fabrizio has always played the role of CEO of the major Italian companies, including TISCALI, an Italian telecommunications company that has become famous all over the world for being the protagonist of the major revaluation of a stock in the Italian stock exchange market.

2018-Present: GM Wings Mobile
2016-2018: AD “JLM Srl
2009-2014: AD “L’unita”
2006-2009: AD “Tiscali Media”
Francesco is currently the president of ESTRA SPA, one of the largest Italian energy groups, with a turnover of over € 1 BILLION / year. “Within Wings Mobile he is in charge of institutional relations.

2018-Present: President “ITS energia e ambiente”
2018-Present: President “Cispel Toscana”
2016-Present: V.P. “Utilitalia”
2016-Present: Executive President “ESTRA SPA”
What makes us so sure of successfully concluding the public sale of Ico Bitwings?
1ST SMARTPHONE IN THE WORLD
Generating up to 2 ETH per month

www.theminephone.com
MINEPHONE WINGS WX – TECHNOLOGICAL REVOLUTION

The MinePhone Wings Wx has been developed with the signing of a Joint Venture named "Neobit", which is a technological startup specialized in protocols and new crypto mining technologies.

It is in fact a true technological revolution that has incorporated into the WX, adding the unique ability to mine the Ethereum cryptocurrency (ETH); the second most famous currency in the crypto universe. It will have the potential to produce up to 2 ETH per month. Thanks to the block validation protocol, “Proof of Data (PoD) “that we have developed.
COMPARATIVE VALIDATION PROTOCOLS
Proof of Work (PoW)

1. The chance to validate a block is determined by how much computational work is done by the miner.

2. The reward is given to the first miner that solves the cryptographic puzzle of each block.

3. The miners compete with each other using the computing power of their computers.
*Proof of Stake (PoS)*

1. The probability of validating a new block is determined by how many coins the validators have.

2. Validators do not receive a block premium, but they charge network fees as a reward!

3. The energy costs of this validation method are much lower but provides less security.

* Not yet operational on the market
Proof of Data (PoD)

1. The probability of validating a block is determined by the activated contract (100, 300, 600, 1000) and by the time of internet connection with the pool within 24 hours.

2. The PoD maintains the energy costs and benefits of the PoS but uses the working and security logic of the PoW that binds the gain with the daily data exchange.
The PoD validation protocol consists of an algorithm (DDR) and a Smart Contract. Through the DDR and an active contract, the MinePhone WX receives Ethereum from the Wings Mine Pool every day, depending on the connection time and the number of data exchanged with it.
Proof of Data (PoD) in Details

But who really extracts the Ethereum?

Through our Smart Contract, we are able to capture computing power from rented pools. *This is the prime secret of our Proof of Data!*

Imagine the Proof of Data as a "sub-protocol" that allows you to connect our smartphones to the pools which then use certified blocks of validation protocols.

To achieve this we use the following combination: DDR + SmartContract + Activation. The first two voices while the activation is on has been discussed in the following slides ...
The Doppler Data Rate (DDR) is a protocol with a registered patent, specifically designed for the management and distribution of data. This protocol is connected to the Wings Mine Pool through which it requests and validates data. Thanks to a Smart Contract generated along the way!

All the Smartphones that will have an internal DDR software installed and an active Smart Contract, will essentially receive a daily reward based on the type of contract (100, 300, 600, 1000) MH / S.

**Note1:** It is necessary to take into account the Internet connection multiplied with the rate at which the DDR generates requests. This is because, does the customer's earnings depend on the number of requests delivered or on the database collected and delivered?

**Note2:** In DDR technology, payment is made directly into the Pool's wallet and then distributed to the client. This is in order to allow us to extract information or give us an answer to our request.
Smart Contract

These are computer codes (scripts) written with specific programming languages. Smart Contracts can be created by individuals, legal entities, machines or other programs that work independently.

A Smart Contract is valid, without depending on the authorities, because of its code nature which can be seen by everyone and cannot be modified by the existing blockchain technology, promoting a decentralized, immutable and transparent nature.

**NOTE:** The projections concerning the trend of the Etherereum estimate that at the end of 2021 its value will be $5,000

This means that all owners of a MinePhone Wings WX1000 have a revenue potential of $360,000 !!!
A FUTURISTIC SMARTPHONE
WX Technical Features

The exterior design is elegant, and very attractive with fingerprint sensors, essential lightness and proximity. Among its main features, we highlight its 6.2-inch screen with a resolution of 1,920 x 1080 and double camera of 24mp + 16mp combined with advanced technology software that grabs a quality of 98Mpx and all with a weight of only 168 gr.

Inside it is a completely new phone. Its chip MediaTek Helio P60 NeuroPilot 8-core supports many innovations. It is provided with 8 GB of RAM and 128 of ROM memory, out of which 32 GB represents a totally encrypted and secure partition where sensitive user data is stored.
WX Technical Features

It incorporates a 3550 mAh battery that has a standby time of 600 hours, 24 hours of conversation and 16 lengthy video calls. Thanks to its fast charging feature which allows us to fully charge the phone in just **45 minutes**.

This terminal incorporates a native service called "**Secure Call 2.0**". With this system, all voice calls are protected by a triple security encryption. The VOIP audio streams that passes through the server cannot be intercepted, not even by Wings Mobile!
The "Neural Tech" technology used in the WX model allows us to make totally secured encrypted calls from the terminal itself. It intelligently manages the battery and its charge, cameras recognizes objects and scenes, detects anomalies in the network, even detects abnormal behaviors such as attempts of intrusion inside the terminal.

We have included the native system "Neural Face Id" that allows the filtering of access to the smartphone essentially. Thanks to the biometric 3D control of the user's face!

The system detects if the user is in the company of a second or third person and allows according to the configured configuration, menus to be showed that have been predefined, hence guaranteeing total privacy.

WHAT IS ACTIVATION? WHY IS IT IN ETHEREUM?

Activation consists of a Smart Contract that enables your MinePhone to generate Ethereum. The activation cost is indicated in Ethereum but can be paid with all cryptocurrencies that allow an exchange with it.

What are bitwings (BWN)?

Bitwings (BWN) is the official cryptomoneta of Wings Mobile, thanks to which you can pre-order the MinePhone.

Wings Mobile - to successfully complete the public phase of its ICO - is implementing a specific marketing strategy based on 4 universal principles.

Price: 6,000 BWN (1 BWN = $0.1 until 06/30/2019)
Only those who own the Bitwings (BWN) will have the right to pre-order the MinePhone and then begin generating Ethereum.
The value of the BWN - which is now $0.1 - will rise over time to double or at least $0.2
Only 40,000 MinePhone WX Limited Edition sets will be produced with the serial number printed on the back.
We guarantee that our Proof of Data validation protocol will not be altered or blocked for the duration of your contract, or at least 3 years !!!
Can I buy the phone first and then activate the contract?

Certainly yes! The process of buying the phone with the process of selection / activation of the contract is ideally independent, giving you the opportunity to choose in the second phase which power you would want.

If I activate a contract, can I activate a higher one paying the difference?

Yes. We will activate the most powerful contract but you will only have to pay the difference. Example, if you have a contract of 300 MH / S (4 ETH) and would like to switch to the 600 MH / S contract (8 ETH). You only need to pay 4 ETH difference and your WX 300 will become a WX 600.
Can I activate a contract with the ETHs that I have already mined?
Absolutely yes! If you have activated, for example, a 600 MH / S contract that produces you 1.2 ETH / Month. After 6 months you are bound to have enough ethereum to go to the 1000 MH / S contract to produce 2 ETH / Month.

How many dollars does the MinePhone cost?
The MinePhone, to date, costs $600. However, the payment is made through our currency called bitwings (BWN). The value of which is $0.1 until 30th June, 2019.

What happens after 30th June 2019?
You will no longer be able to buy the MinePhone with a 50% discount because the value of the BWN will go up to $0.15. So its cost then will be $900 instead of $600.
What happens if the complexity of ETH production increases?
Absolutely nothing. In contrast to the traditional PoW minerals that suffer greatly from the increase in computation complexity because their GPUs suffer a "performance deterioration", the minephone can undergo a variation of no more than 5%.

Who can guarantee me that I can produce Ethereum for 3 years?
It will be the smart contract that is generated during the activation of the contract. Because, by its nature, it can not be modified in any way once it is released in the blockchain. In addition, to provide a double guarantee, a second physical contract is signed between the user and Wings Mobile which guarantees the volume of ethereum to be produced.
How can I book my MinePhone?

The operation is very simple. Simply register with the bitwings platform (BWN) and proceed with the purchase process. So book your Minephone. Subsequently, it will be necessary to carry out the KYC process and token claim purchased within an ewallet eth erc20.
I have no great experience in crypto or e-wallet. How can I do this?

No problem! We have developed a system that allows you, even if you do not understand anything about crypto coin, to participate in our ICO, receiving assistance step by step 24H. All this thanks to the ..
The Bitwings Academy allows us to be the first ICO in the world to use an interactive messenger robot that assists the user, even the less expert, in all operations (purchase, KYC, claim)
MULTILINGUAL MENU ICO ACTIONS

We know very well that navigating within a platform can be very complex for a user, especially if the user is offered nested combinations between them.

That's why, thanks to the simplified visual representation of the actions that can be performed, the user has the possibility to reason for macro arguments, then accessing interactive tutorials for specific actions.

ROBOT FACEBOOK INTERACTIVE MESSENGER

It is an absolute novelty in the world of ICOs. Using the potential of messenger robots the user has the possibility to access specific sections by observing, step by step and through screenshots, all the actions he has to complete to complete the action.

Thanks to our robot also the operation of creating an e-wallet and the addition of a token custom eth erc20 is simple.
Bitwings Academy is much more. Because we are the 1st company in the world to have created an affiliation system through a facebook messenger robot.
Whoever wants to promote our minephone will be able to use our promotional robot (yes, we have created a specific minephone) ...
... so as to exploit the huge catchment area that the most famous social network in the world owns: Facebook.

Note: Users using Facebook in the World are more than 1 billion
